Education Abroad Campus Liaisons

Education abroad provides students across all disciplines and backgrounds with access to academically rigorous and culturally immersive study abroad opportunities. We are committed to working with faculty and staff across campus to support our mission. To ensure a high level of service to the campus community, our office appoints staff members to act as liaisons for each academic college and many campus departments. Most importantly, each EA liaison serves as point-person for inquiries and requests from our campus partners. EA liaisons are available to your department to share information about EA opportunities and collaborate to promote study abroad opportunities to your students.

Academic Colleges
